

INTRODUCTION (产品介绍)

Thank you for choosing Cooltec STD4 S.BUS TO PWM Decoder, STD4 is designed to allow the user to convert an input S.BUS signal into a corresponding PPM signal output.

感谢您购买COOLTEC的STD4 S.BUS转PWM信号解码器，STD4是用来将S.BUS信号转换成多个PPM信号输出的设备。

OVERVIEW (产品概述)

HOW TO CONVERT BETWEEN 1~4CH AND 5~8CH OUTPUT(怎样转换1~4通道或5~8通道输出)

STD4 is designed to convert 1~4channel or 5~8channel signal output from S.BUS signal, when the welding spot1 and 2 as shown image are welded, the output signal will be 5~8channel, otherwise the output signal is 1~4channel.

STD4能从S.BUS通道转换1~4通道或5~8通道输出，如下图，如果焊点1和焊点2连焊在一起，这时信号输出会是5~8通道，如果这两个焊点没有连接那么输出将会是1~4通道。
