

Changzhou Yiyi International Trading Co., Ltd.

Injection Product Catalog

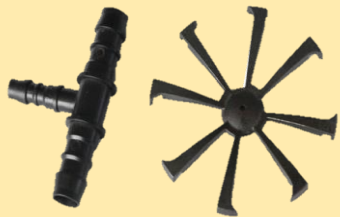

Factory Profile

Our factory covers an area of over 10,000 square meters, more than 60 employees. Specializing in injection molding and processing all kinds of mold design, production processing. We have a wealth of mold design, manufacturing experience, with a comprehensive software system that can help customers solve the technical aspects of a comprehensive problem. Our existing brand computer horizontal injection molding machine, vertical screw injection molding machine a total of 20 sets of equipment, improve the supporting facilities. We mainly produce garden tools plastic parts, agricultural irrigation equipment plastic accessories and accessories, electronic household electrical appliances plastic shell and accessories, logistics equipment plastic parts, automotive plastic parts, plastic rails and many other varieties.

Gear In jection molded parts

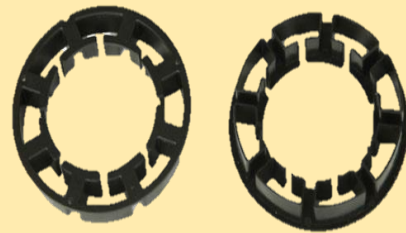

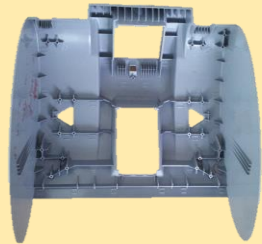

Products are widely used in car
DVD, photocopiers, cameras,
timer, speed reducer, instruments
and meters, paper shredder,
muffler, watch, filters, medical
instruments , etc.

Printing copying fax equipment Injection molded parts

Material quality : molded base-S50C,
Front molded- NAK80,
Back mould-NAK80
Surface treatment: polishing
Mould opening cycle : 20 days
Die service life : 300 thousand die

Battery cart bicycle Injection molded parts

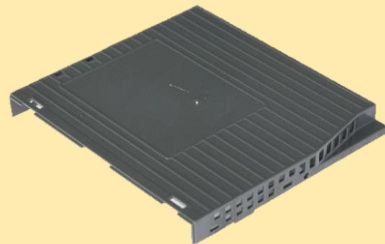

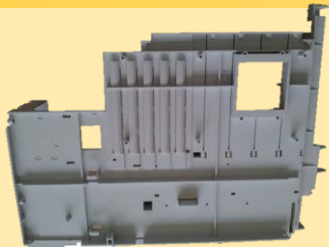

Plastic parts of bicycle, plastic part of electric bicycle, whole car plastic parts, small bee all car plastic parts, the front insert parts can be supplied.

Computer Injection molded parts

1. Die cavity : 1*1
2. Die core material : SKD11
3. Mould opening cycle : 30 days
4. Die service life : 50 thousand die

Electric Injection molded parts

- 1, Provide 2D or 3D drawings or samples
- 2, Specify the requirements of the specific material
- 3, Other surface treatment, such as painting, electroplating, drawing, silk screen, please note.
- 4, Because plastic products have different sizes according to different material, longitudinal and transverse contraction is different, have special accuracy requirements for size in assembly.

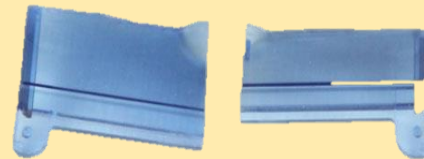

Electronic products Injection molded parts

Our company has advanced injection
molded equipment and precision
winding machine

can dispose a variety of sizes of
precision injection products. can
develop and design molded according
to , improve the quality of service

Anti static Injection molded parts

Extrusion processing of products by our company, extrusion die making, processing of extrusion products are all completed by our company.

Our company has many years of PVC production experience, has a skilled development teams and the production sector with strict quality management.

We are committed to providing customers with high quality products and better prices

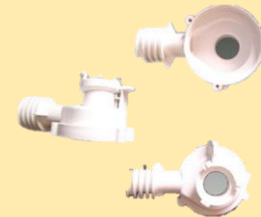

Machine shell Injection molded parts

Main products: Outer shell of electronic instrument, lamp shell, plastic parts, etc.

Material : ABS,PC,PP,PA,POM,AS, Glass fiber, Nylon ,SPVC , etc.

Specifications : standard specifications or according to customer's drawing or sample requirement

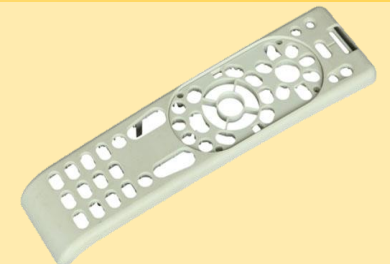

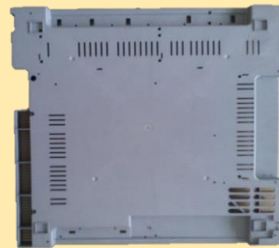

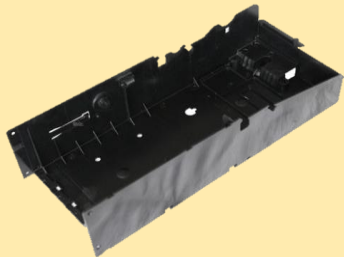

Surface treatment :Spray painting, printing, bite flower, electroplating, etc.

Household appliances Injection molded parts

Develop household electric appliance molded like TV, air conditioner, washing machine, vacuum cleaner, telephone set, etc. Can be customized according to the drawings.

Wine bottle Injection molded parts

Each parts should be carefully checked and measured and be tested by specialized testing room, experienced mechanic match die to according to the tolerance.

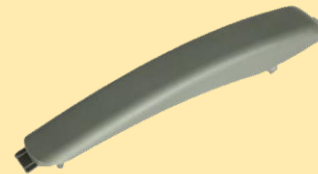

The mould pass the injection moulding department test to verify the function of the mould that can meet customer requirements.

Automotive Injection molded parts

Each parts should be carefully checked and measured and be tested by specialized testing room, experienced mechanic match die to according to the tolerance. The mold pass the injection mold department test to verify the function of the mold that can meet customer requirements.

Handle Injection molded parts

Confirmed molded drawings will have a process layout by molded craft personnel. molded craft personnel will plan special machining processes and methods. We attach importance to the selection of the molded material and do heat treatment for it, which has a very important influence on the service life of the molded.

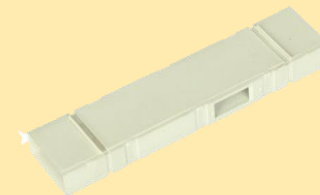

Daily Necessities Injection molded parts

Raw material thickness range: 0.5mm~5mm
thickness

Cover normal metal sheet
stainless steel, brass and so on.

Surface treatment: normal plating such as Zinc
plating, Nickel plating, Tin plating and so on

E-coating, Painting, Powder coating, Anodizing
and so on.

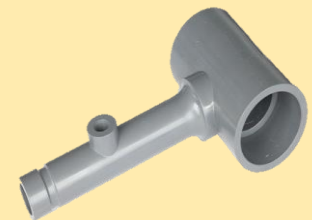

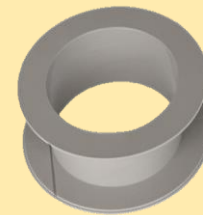

Production equipment Injection molded parts

Moldie advantages for plastic injection processing molding service:

- 1.high technic
- 2.Low quantity is acceptable
- 3.Strict quality control system.
- 4.Advanced equipment, excellent R&D teams
- 5.Professional technicians and rich experienced workers.

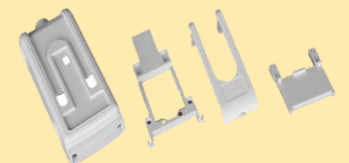

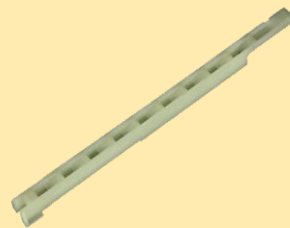

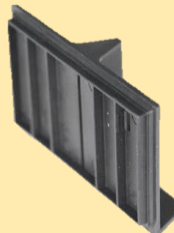

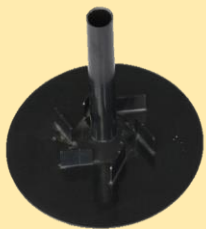

Laboratory office equipment Injection molded parts

Professional testing : From the processing and design of injection molded products to plastic processing and testing mode all have professional persons to test, to ensure the quality of product processing.

Quality assurance : strictly in accordance with the international first-class standard of material selection and manufacturing process to ensure high quality requirements for injection molded process.

Plastic bearing seat Injection molded parts

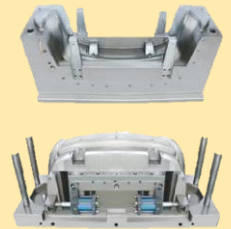

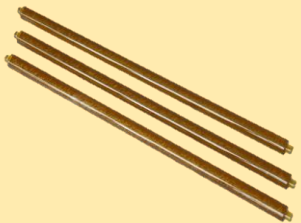

Provide processing services of various specifications of the standard parts and non-standard parts : POM shaft sleeve , POM bearing , POM sleeve, POM seal ring, POM back-up ring, POM guide ring, POM slider, POM gear, POM screw etc.

Sports, fitness equipment Injection molded parts

Produce the products according to the
drawings or samples provided by the
customer Application material range :
PVC,PP,ABS,PVDF,PA6,PA66,
PA12,PTFE,PPO,PPS,PC,PBT,PC ,etc.

Communications equipment Injection molded parts

Product Name: communication equipment

1. Product specifications : 250*80*30mm
2. Material quality : PC+ABS
3. Surface treatment : bite flower
4. Product requirements : no shrink, scratch, weld marks, broaching die, different colors in appearance

Toys and gifts plastic Injection molded parts

Produce the products according to the drawings or samples provided by the customer Application material range :
PVC,PP,ABS,,PA66,,PC ,etc.

Flame retardant properties, anti UV, anti static and other properties can be done according to customer requirements

Medical Injection molded parts

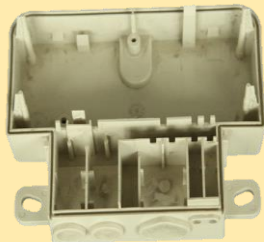

Medical equipment injection moulding parts have high precision requirements, high color transparency requirements, high cleanliness requirements, products has won ISO9001 and UL approvals.

Instrument and meter Injection molded parts

molded standard :
DME ,HASCO,MISUMI
molded protection :
anti rust oil, sealing film, wooden box
molded cavity : 1*1,1+1,4+4,1*8,8+8,1*16,etc.
Steel products : H13,420, 2343,2344,S-
STAR,NAK80,etc.Can harden the steel according to
the
requirements
Hardness : HRC36~40,HRC50~52 , etc.

Sound speaker Injection molded parts

External resistance: including anti UV,
waterproof, corrosion resistance, flame
retardant, anti-static, etc

Impact force and aging resistance:
durable

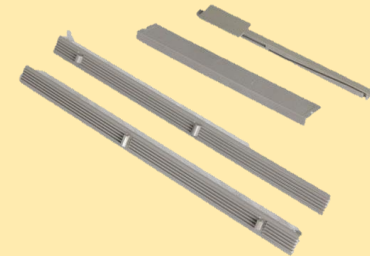

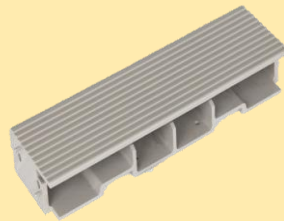

Environmental protection :100% new
material, can provide the relevant test
report

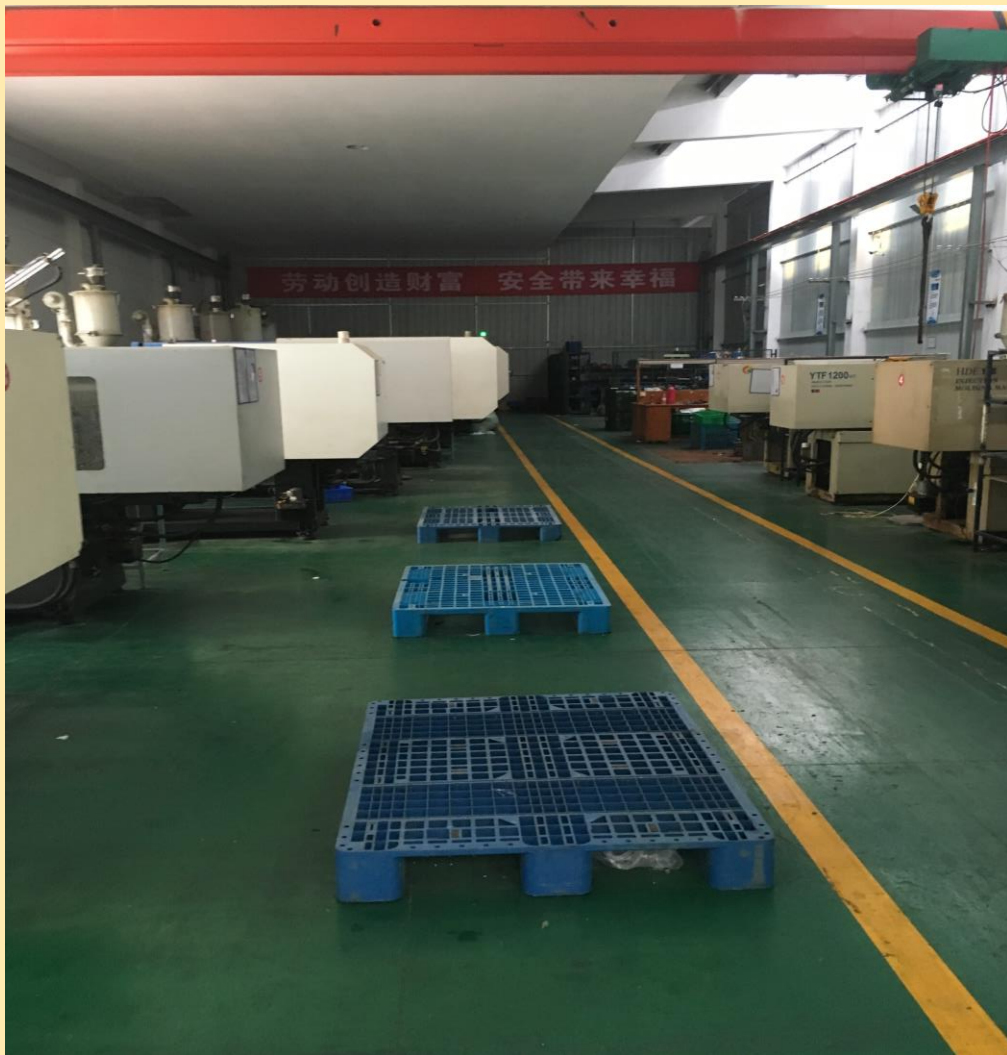

Bank ATM machine Injection molded parts

Production process : audit drawings-
mode flow analysis-design validation-
customize materials-molded base
machining-molded core machining-
electrode processing-runner system
processing-parts processing

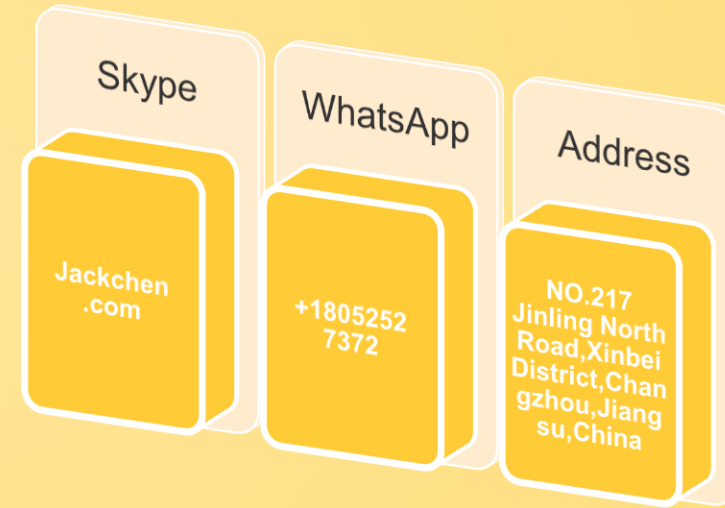

Our injection molding factory
