董事长寄语

CHAIRMAN MESSAGE

朋友们：

大家好！欢迎您访问神箭神舟,感谢您对神箭神舟长久的关注与支持。

神箭神舟肩负着社会和历史的责任，在过去的岁月里，以“振兴民族企业，造福人类社会”为宗旨，将企业发展与个人成功及社会进步紧密结合在一起，不断自强不息，努力奋斗，努力实践员工、企业、国家、社会的共同进步与发展。

今后，我们将一如既往，继续秉承“振兴民族企业，造福人类社会”的企业宗旨，用宇宙般的博大胸怀拥抱社会各界朋友、有识之士，为共同创造多赢的和谐局面努力奋斗。

最后，祝愿我们的人民健康幸福！祝愿我们的企业蓬勃发展！祝愿我们的国家繁荣昌盛！祝愿我们的人类和谐美好！

企业概述 PROFILE

关于我们

神箭神舟2004年2月成立于中国北京中关村，主要从事生物健康产业的研发、生产、销售，市场活动的策划、宣传，团队组织的培训、提升等。

在过去的岁月里，神箭神舟人在各级政府及社会各界的关心支持下，不怕困难、不畏艰险，严于律己、甘于奉献，团结友爱、积极乐观，坚持不懈、奋勇向前。

截止目前，企业已建成占地100亩的现代化生物研发生产基地。公司配备全套的现代化GMP厂房车间、全自动发酵系统、全自动灌装系统、全自动外包系统、现代化的物理化学实验室、无菌实验室、仓储、办公、会议等设备设施。

企业先后荣获国家高新技术企业认证、新技术新产品认证、辽宁省专精特新产品认证、葫芦岛市高新技术企业认证、葫芦岛市高新技术产品认证、海淀区创新企业认证、中关村高新技术企业认证等。

企业申请并拥有益生菌素研发生产应用方面的国家发明专利数十项，拥有自主知识产权和自主品牌的产品30多项。产品涉及女性生殖健康、呼吸道健康、口腔健康、手足皮肤、家庭日用等领域。

2016年，神箭神舟航天生物益生菌素“闺之蜜语”妇科凝胶产品一举获得“第二届世界微商大会”金奖，并畅销全国。

航天生物益生菌素应用产业化项目，目前处于世界领先。神箭神舟通过我国的载人航天技术，将微生物益生菌菌种带入太空。在太空的微重力、交变磁场、太阳高能粒子等多种地面无法模拟的环境因素诱变下，获得优良的用于可生产的益生菌菌种。再将诱变后的益生菌菌株留种保存并应用于生产、发酵、提取获得益生菌素，再利用益生菌素应用开发人类需要的各种健康产品。

益生菌素这种依赖人体共生体益生菌代谢产生的代谢产物是人类最需要的也是最好的杀菌消炎物质。它真正做到了选择性杀菌的目的，有效杀菌的同时更有效的保护了人体的共生体益生菌。较之于化学合成产品、抗生素等具有不可比拟的独特优势。

神箭神舟人将始终秉承“振兴民族企业、造福人类社会”的宗旨，本着诚信负责、互利共赢的原则，欢迎并拥抱社会各方力量，共同紧抓时代机遇，携手为实现生物健康领域的中国梦而努力奋斗。

ABOUT US

Singso was established in Zhongguancun of Beijing China in Feb 2004, mainly engaging in the bio-health industry R & D, production, sales, marketing activities planning, publicity, team organization training and improvement and so on.

Over the years, under the concern and support of governments at all levels and all walks of life, the brave, optimistic Singso people have conquered all kinds of difficulties to forge head by working together in the spirit of dedication.

So far, the company has built a modern biological R & D production base covering an area of 100mu. It is equipped with a complete set of modern GMP plant workshop, automatic fermentation system, automatic filling system, automatic outsourcing system, modern physical chemistry laboratory, sterile laboratory, storage, office, conference and other facilities.

The company has won Huludao High-tech Enterprise Certification, Huludao High-tech Product Certification, Liaoning Specialized New Product Certification, Zhongguancun High-tech Enterprise Certification, Haidian District Innovative Enterprise Certification, National High-tech Enterprise Certification, New Technology and New Products Certification and so on.

The company has applied for and owned dozens of national invention patents in the probiotic rhzomorph R & D, production and application, has more than 30 products with independent intellectual property rights and independent brand, involving women's reproductive health, respiratory health, oral health, hand and foot skin care, household health and other fields.

In 2016, Singso's gynecological gel product "Girlfriend Whisper" made of Shenzhou aerospace biological probiotic rhzomorph won the gold award of the Second World Micro Business Conference and has been sold throughout the country.

The company's aerospace biological probiotic rhzomorph industrialization project is currently in the world's leading place. By the manned space technology, Singso's probiotics were taken into the space. Under the environmental mutagenesis of space microgravity, alternating magnetic field, solar energy particles and a variety of ground factors cannot be simulated in ground, the high-quality probiotic strains for production was obtained. And then the mutant strains of probiotic bacteria are preserved and used in production, fermentation to get probiotic rhzomorph through extraction, which are used to develop a variety of products to meet need of human health.

Probiotic rhzomorph is the metabolic product produced by the metabolism of human symbiont probiotics, which is the best bactericidal and anti-inflammatory substance most needed by human being. It truly achieved the purpose of selective sterilization, protected the body's symbiotic probiotics at the same time of effective sterilization. Compared with the chemical synthesis products, antibiotics, it has unparalleled unique advantages.

Singso people will always adhere to the tenet of "revitalizing national enterprises, benefiting human society", welcome and embrace all social parties in good faith and in the principle of mutual benefit. We will seize the opportunity of the times to work together to achieve the China dream in the field of biological health.

企业文化 CORPORATE CULTURE

发展历程 DEVELOPMENT COURSE

2008年

神箭神舟正式启动 开展技术服务
Singso was officially launched to carry out technical services

2009年

获国家发明专利证书
Singso won the national invention patent certificate

2010年

获国家高新技术企业
Singso was awarded the title of National High-tech Enterprise

2011年

厂房建成并试产
the plant was built and put into trial production

2013年

获北京市高新技术企业
Singso was awarded the title of Beijing High-tech Enterprise

2014年

产品正式走向市场
the products were formally launched into the market

2015年

获315企业征信立信企业
Singso won 315 Enterprise Credit Enterprise

2016年

益生菌产品全国热销
the probiotic rhzomorph products were sold nationwide

2004年

神箭神舟创立
Singso was established

2008年

成功搭载菌种进入太空
the strains were successfully carried into the space

2009年

基地建设完成 产品进入研发 成为了首批辽宁省政府扶持的企业
the base construction was completed, the products entered the R & D stage and the company was among the first batch of government support enterprises in Liaoning

2010年

获中关村高新技术企业
Singso was awarded the title of Zhongguancun High-tech Enterprise

2012年

公司获得了A轮投资
Singso won the A round of investment

2013年

产品试营销 定包装及宣传片
the products were put into trial marketing, the package and trailer were determined

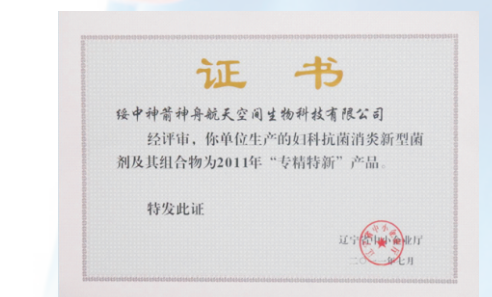

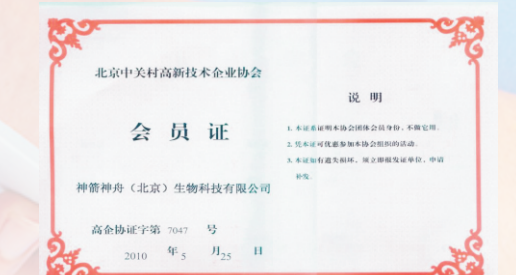

2015年

公司获得了B轮投资
Singso won the B round of investment

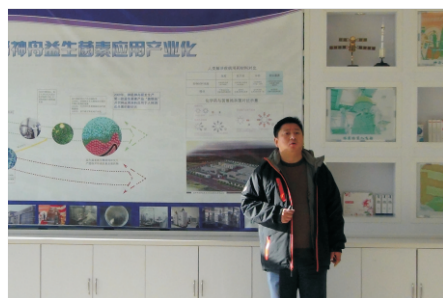

2015年

公司结合互联网技术创新形成“益生共赢”商业模式
Singso developed the "prebiotics win-win" business model by combining with Internet technology innovation

技术介绍篇
TECHNOLOGY

2.1/益生菌素 PROBIOTIC RHZOMORPH

概念 CONCEPT

什么是益生菌素？ What is probiotic rhzomorph?

益生菌素是指益生菌自身在生命活动过程中产生的一些小分子物质，是具有抗菌特性的一系列活性代谢产物的总称。益生菌素是益生菌产生益生功能的代谢物质，而非益生菌本身。

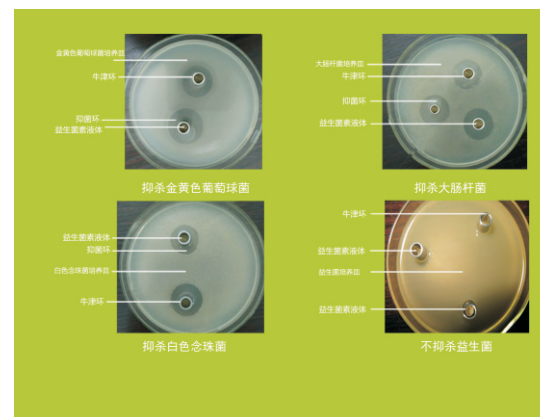

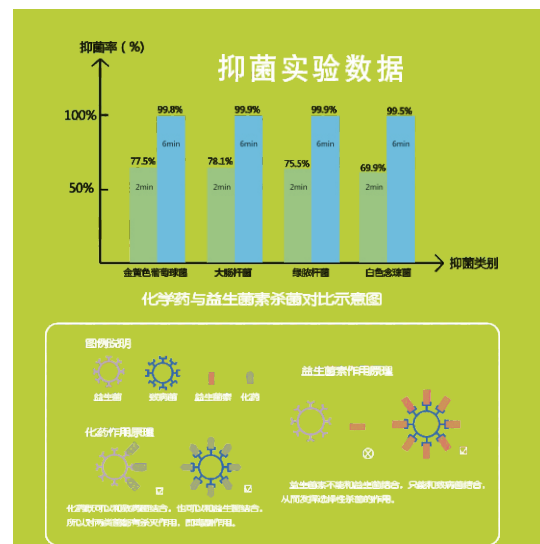

Probiotic rhzomorph refers to some small molecules produced in the life process of probiotics, which is the generic term of a series of active metabolites featuring antibacterial properties. Probiotic rhzomorph is the metabolites producing probiotic functions, rather than probiotics itself.

机理 MECHANISM

使用化药杀菌，益生菌和致病菌都被杀灭，破坏了由益生菌和益生菌素构成的免疫屏障，致病菌直接侵害黏膜细胞，导致炎症在停止使用化药后反复发作；使用益生菌素杀菌，杀灭致病菌的同时，保护了益生菌，使益生菌构成的免疫屏障得到修复和重建。

The use of chemical sterilization kills both probiotics and pathogens, destroys the immune barrier constituted by probiotics and probiotic rhzomorph, and the pathogens directly damages the mucosal cells, resulting in the repeated occurrence of inflammation after the use of chemical. On the contrast, the use of probiotic rhzomorph protects the probiotics at the same time of killing the pathogens, thus repairing and rebuilding the immune barrier constituted by probiotics.

特点 FEATURES

益生菌素牛津杯抑菌效果实验

产品优势 PRODUCT ADVANTAGES

1 安全 Safety

产品由健康人体益生菌株发酵生产而成，是最适合人体腔道环境的。所以益生菌素系列产品是完全无毒副作用的。

The product is produced by the fermentation of healthy probiotic strains, which is most suitable for the cavity environment of human body. So the probiotic rhzomorph series products are completely free of toxic side effects.

2 高效 Efficiency

经过航天搭载后的益生菌经过太空诱变改良，改良后的菌株发酵产物杀菌能力是原有基础上的数百倍，抑菌率高达99%。

The probiotics has been improved by space mutation after being carried into aerospace and the sterilization capacity of the improved strain fermentation products is hundreds of times than the original, with the antibacterial rate as high as 99%.

3 靶向 Target

产品由益生菌发酵而成,有效杀灭致病菌的同时也保护了人体腔道内的益生菌。

The products are produced by probiotic fermentation, which protects the probiotics in the cavity at the same time of effectively killing the bacteria.

应用 APPLICATION

通过航天搭载太空诱变育种，可以筛选出比出发菌株效价高出数倍的突变菌株，也可以获得A组份含量比出发菌株高出数倍的菌株，还可以筛选出比出发菌株生产周期缩短数倍的突变菌株，这些菌株经生产转化后可以获得惠及民生的实际应用价值及良好的经济价值。例如，用于保护人体各腔道微生态环境的消炎杀菌产品，用于食品保鲜的防腐产品，以及用于改善人体健康状况的营养保健食品等。

Though aerospace mutation breeding, the company screened out the mutation strains with several times higher effect than the original strains, obtained the strains with several times higher of A group content. It also screened out the mutation strains with several times shorter production circle. These strains can achieve benefiting practical application and good economic value by production and conversion.

2.2/航天诱变 SPACE MUTATION

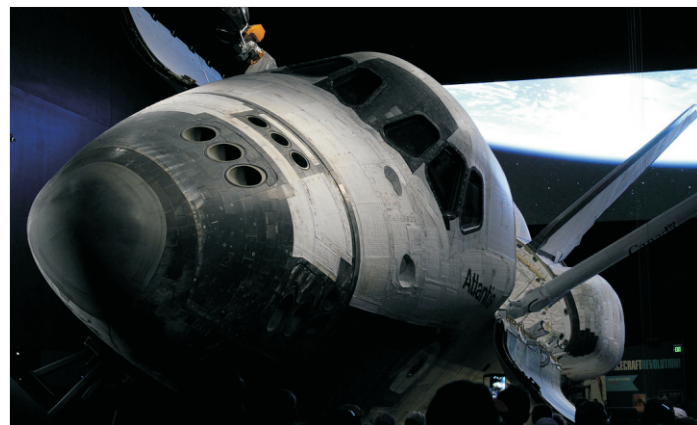

利用航天平台进行生物改造,获得生长周期短,生物产量大,安全性高,代谢产物转化率高的菌种。

Space platform is used for bio-transformation to obtain strains with shorter growth circle, large biological yield, high safety and high metabolic conversion rate.

航天诱变属于内源基因的改变,没有安全危害;转基因产品有外源基因导入,所以有安全隐患。

Space mutation is the change of endogenous gene, without safety hazard, whereas the transgenic products undergo exogenous gene introduction, so there are safety risks.

产品介绍篇
PRODUCT

日用渠道 Daily Channel

益生菌素面膜 Probiotic Rhzomorph Mask

含有益生菌素成分的面膜，能够深层清洁、祛角质、祛除氧化油脂，并在补水保湿的基础上进行美白、抗衰老平衡油脂等保养工作，用于日常面部护理。

The mask containing probiotic rhzomorph can deeply clean and remove horny, remove oxidized oil, whiten the skin, playing a role of anti-aging and keeping balance of grease. It is used for daily facial care.

益生菌素洗面奶 Probiotic Rhzomorph Facial Cleanser

含有益生菌素成分的洗面奶灭杀面部有害细菌，保持面部清洁，光滑温和不刺激皮肤。用于早晚面部清洁，清洗忙碌一天沾染的纤尘。

The mask containing probiotic rhzomorph can kill the harmful bacteria to keep the face clean and smooth, and is free of irritation. It is used for morning and evening facial cleansing.

益生菌素男士喷剂 Probiotic Rhzomorph Male Spray

私处喷涂，用于男性私处日常杀菌，修复、养护男性私处皮肤，也可用于游泳、桑拿、温泉、酒店、旅行等公共场所针对私处的防护及养护。

Spray on intimate area. It is used for daily male intimate skin sterilization, repair and caring. It can also be used for the protection and care of the intimate area in swimming, sauna, spa, hotel, travel and other public places.

日用渠道 Daily Channel

益生菌素洗发水 Probiotic Rhzomorph Shampoo

含有益生菌素成分的洗发水，能够起到更好的杀菌效果，而选择性杀菌的特点可以更好的保留头皮表面本身的有益菌，这样就能够更好的滋养头皮，温养秀发，用于日常头部的清洁护理

The shampoo containing probiotic rhzomorph can play a better bactericidal effect. Its characteristics of selective sterilization can better retain the beneficial bacteria on the surface of scalp to better nourish the scalp and hair. It is used for daily head care.

益生菌素护发素 Probiotic Rhzomorph Hair Conditioner

含有益生菌素成分的护发素，在清洁头发的同时保证发丝光滑柔顺，避免干燥、油腻的现象。日常洗发后在头发上均匀涂抹，可滋养秀发。

The hair conditioner containing probiotic rhzomorph can make the hair smooth and supple at the same time of cleaning the hair to avoid dry, greasy phenomenon. Evenly spread proper amount after cleaning the hair.

益生菌素沐浴露 Probiotic Rhzomorph Shower Gel

含有益生菌素成分的沐浴露，可以将皮肤上和毛孔中累积的污垢和油脂溶解并清理干净，让皮肤可以保持清爽和清洁，不会受到脏污的损害，也能防止因皮肤毛孔堵塞而导致的一些皮肤问题的出现。用于日常身体的清洁。

The shower gel containing probiotic rhzomorph can dissolve and clean the dirt and grease in the pores so that the skin can remain fresh and clean, free of the damage by dirt. It can also prevent the occurrence of some skin problems caused by pore clogging.

日用渠道 Daily Channel

益生菌素洗手液 Probiotic Rhzomorph Hand Sanitizer

由益生菌素调配而成的洗手液不含任何对人体有害的化学成分，且能达到高效选择性杀菌的效果，温和不刺激，保护手部肌肤健康，孕妇小孩均可使用

The hand sanitizer containing probiotic rhzomorph is free of any harmful chemicals, can achieve efficient selective sterilization, which is gentle and mild and is a good choice to protect hand skin health. It is safe to pregnant women and children.

蚊不叮 Mosquito Shield

含有益生菌素成分的驱蚊剂，能够更好地提升皮肤抗敏能力，防止皮肤感染，从根本上解决蚊虫叮咬的困扰，用于户外驱蚊防叮咬。

The mosquito repellent containing probiotic rhzomorph can better enhance the skin anti-allergic ability to prevent skin infections, provide a fundamental solution to the trouble of mosquito. It is used for outdoor insect repellent.

益生菌素喷鼻液 Probiotic Rhzomorph Nasal Spray

含有益生菌素的鼻腔喷雾，能够更好的保护鼻腔内的健康环境，可治疗并缓解季节性和常年性过敏性鼻炎、常年性非过敏性鼻炎，预防鼻息肉及切除后鼻息肉的再生，是鼻炎多发人群的常备用品。

The Nasal Spray containing probiotic rhzomorph can better protect the nasal health environment, suitable for the treatment of seasonal and perennial allergic rhinitis, prevention of the nasal polyps regeneration after polyps excision, which is a standing store of rhinitis supplies.

日用渠道 Daily Channel

益生菌素漱口水 Probiotic Rhzomorph Mouthwash

含有益生菌素成分的漱口水，在日常口腔保健之余，加强口腔的清洁护理，杀灭口腔中的有害细菌，保证口腔健康，多用于饭前饭后使用。

The mouthwash containing probiotic rhzomorph strengthens oral cleaning in addition to the daily oral care. It kills the harmful bacteria in the mouth to ensure oral health, mostly use before and after meals.

益生菌素口腔喷剂 Probiotic Rhzomorph Oral Spray

含有益生菌素成分的口腔喷剂，能够更好的清洁口腔，保持口气清新，快速消灭刺激性气味，通常用于户外口腔清洁，祛除口气。

The oral spray containing probiotic rhzomorph can better clean the mouth, keep fresh breath and quickly eliminate the irritating odor. It is usually used for outdoor oral cleaning and bad breath removal.

益生菌素牙膏 Probiotic Rhzomorph Toothpaste

含有益生菌素成分牙膏在杀灭口腔细菌的同时，亮白牙齿，修复牙釉质，具有深层保护口腔健康的作用，日常用于早晚口腔清洁，摆脱口腔炎症的困扰。

The toothpaste containing probiotic rhzomorph brightens teeth, repair enamel, playing the role of maintaining oral health. It is used for morning and evening oral cleansing to get rid of oral inflammation problems.

日用渠道 Daily Channel

益生菌素女士喷剂 Probiotic Rhzomorph Female Spray

用于外阴部位日常杀菌，修复、养护外阴皮肤，经期前后使用，也可用于游泳、桑拿、温泉、酒店、旅行等公共场所针对私处的防护及养护。

For daily vulva sterilization, take care of the vulva skin, use before and after the menstrual period. It can also be used for the protection and care of the intimate skin in swimming, sauna, spa, hotel, travel and other public places.

益生菌素私护凝胶 Probiotic Rhzomorph Intimate Skin Care Gel

炎症感染期的私处杀菌，修复、养护生殖系统，经期前后及产后使用。与茵维她洗液配合使用效果更佳。

Intimate skin sterilization during the inflammation period, repair and care the reproductive system, use before and after the menstrual period. Use with InViTa lotion will have better results.

益生菌素私护洗液 Probiotic Rhzomorph Intimate Skin Care Lotion

用于日常生活保健护理，私处的杀菌，修复、养护生殖系统，经期前后及产后使用。与茵维她凝胶配合使用效果更佳。

Daily life care, repair and care the reproductive system, intimate skin sterilization, use before and after the menstrual period. Use with InViTa gel will have better results.

日用渠道 Daily Channel

神箭神舟四季款湿纸巾 Singso Four-season Wet Tissue

含有益生菌素成分的湿巾，是用于日常滋润皮肤、清爽皮肤，解决皮肤因干燥产生的瘙痒和杀菌清洁的作用。

The wet tissue containing probiotic rhzomorph ingredients is used for daily skin moisturizing and refreshing, solve the itching caused by dry skin, playing a role of sterilization and cleaning.

益生菌素香皂 Probiotic Rhzomorph Soap

含有益生菌素成分的香皂可以更加彻底的清理皮肤上的泥土污垢、皮肤分泌物、排泄物、化学物质或细菌。用于身体清洁，可以保护滋养皮肤。

The soap containing probiotic rhzomorph can thoroughly clean the dirt, skin secretions, excretions, chemicals and bacteria. It can be used for body cleaning and skin nourishment.

益生菌素洗洁精 Probiotic Rhzomorph Washing-up Liquid

含有益生菌素成分的洗洁精，选择性杀灭有害菌，杀菌率高达99.99%，具有温和细腻、迅速分解油腻、快速去污除菌、有效彻底清洁、不残留的功效时常使用以确保居家卫生，避免病菌传染。

The washing-up liquid containing probiotic rhzomorph can selectively kill the harmful bacteria, with the sterilization rate up to 99.99%, featuring mild and delicate, rapid greasy decomposition, fast decontamination, sterilization, effective and thorough cleaning and no residual. Regular use can maintain the household hygiene and avoid bacterial infection.

茵维她系列产品
INVITA SERIES PRODUCTS

茵维她妇科洗液 InViTa Gynecological Lotion

使用方法：

取原液10–20ml，倒入冲洗器，再加入30–40ml温水，拧上导管，摇匀，把导管送至阴道深处慢慢将药液挤入阴道内，冲洗阴道。也可洗净外阴，用无菌纱布沾湿本品擦拭或湿敷外阴。10天为一个疗程。

适用范围：

日常生活保健护理，私处的杀菌，修复、养护生殖系统，经期前后及产后使用。与茵维她凝胶配合使用，效果更佳。

Usage:

Put 10–20ml lotion into the rinser and add 30–40ml warm water, screw on the catheter and shake; next, put the catheter deep into the vaginal and slowly squeeze the liquid into the vagina for rinsing. It can also used to rinse the vulva by wiping with moistened sterile gauze. 10 days are a course of treatment.

Scope:

Daily life care, repair and care the reproductive system, intimate skin sterilization, use before and after the menstrual period. Use with InViTa lotion will have better results.

神箭神舟茵维她妇科凝胶 Singso InViTa Gynecological Gel

使用方法：

每晚一支，5–7天为一个疗程。

适用范围：

炎症感染期的私处杀菌，修复、养护生殖系统，经期前后及产后使用。与茵维她洗液配合使用，效果更佳。

Usage:

1 pc per night, 5–7 days are a course of treatment.

Scope:

Intimate area sterilization during the inflammation period, repair and care the reproductive system, use before and after the menstrual period. Use with InViTa lotion will have better results.

茵维他男士喷剂 InViTa Male Spray

使用方法：

私处喷涂，每日1–2次，每次2–3喷，起到较好的保健作用。

适用范围：

私处喷涂，每日1–2次用于男性私处日常杀菌，修复、养护私处皮肤。也可用于游泳、桑拿、温泉、酒店、旅行等公共场所针对私处的防护及养护。

Usage:

Intimate area spray, 1–2 times per day, 2–3 times of spray each time, can play a good role of health care.

Scope:

For daily male intimate area sterilization, 1–2 times per day, repair and take care of the intimate skin. It can also be used for the protection and care of the intimate skin in swimming, sauna, spa, hotel, travel and other public places.

茵维她妇科喷剂 InViTa Gynecological Spray

使用方法：

外阴喷涂，每日1–2次，每次2–3喷，起到较好的保健作用。

适用范围：

用于外阴部位日常杀菌，修复、养护外阴皮肤，经期前后使用。也可用于游泳、桑拿、温泉、酒店、旅行等公共场所针对私处的防护及养护。

Usage:

Vulva spray, 1–2 times per day, 2–3 times of spray each time, can play a good role of health care.

Scope:

For daily vulva sterilization, take care of the vulva skin, use before and after menstrual period. It can also be used for the protection and care of the intimate skin in swimming, sauna, spa, hotel, travel and other public places.
