

Features

Easy of use

Just plug in the phone / network lines and enter your IP configuration and home phone number, then it is ready for use. While making a call, you only need to dial * before the phone number and # afterwards, and the line is on.

No registration and additional fee required

You can start to use FONEMOSA right after purchase without extra registration process and additional fee. It is convenient, cost saving and requires only the Internet line.

Complete configuration and management tools

FONEMOSA can be configured not only through web based management tool but also a traditional telephone set. It can be configured by the use of a telephone set only or through a web browser from a remote site.

Transit-in call for remote usage

If you were away from home/office, with the transit-in call feature, you may still call back to your FONEMOSA at home/office and contact to another FONEMOSA owners.

Transit-out call for reaching more people cost effectively

With the permission of another FONEMOSA owner, you may call any people located in the same area as that FONEMOSA's. No more international or long distance call cost.

Call forward to increase your mobility

With the call forward feature, you enjoy the follow-me services immediately. You can receive calls wherever you are, with any FONEMOSA located around you.

Programmable dialer for cost savings on phone bills (ISR/LD)

If you are using the cost saving service provided by the ISR or LD service providers, FONEMOSA can be configured to dial the required access codes automatically.

Support T.38 fax relay

FONEMOSA provides fax over IP service for up to two ports. Same as on voice communication, you can configure the FONEMOSA to transit the fax to any designated FONEMOSA around the world.

FTP/TFTP remote software upgrade

FONEMOSA supports FTP and TFTP remote software upgrade.

Support NAT

FONEMOSA supports NAT. They can connect with each other no matter public IP's or private IP's are used.

Lifeline support

FONEMOSA has lifeline support feature, which ensures that users will always be able to make phone calls, even if there is a power shutoff.
