m in/out}$  are less than 20%.

- Variation of offset voltage  $\textit{V}_{\rm os}$  is less than  $\pm\,16\text{mV}.$ 

- Other parameters in Table 1. are still within their ranges stated in Table 1.

#### Soldering Conditions

APSEMI

ß

The following conditions should be preserved. Solder ability should be checked by yourself,

because it is depend on solder paste material and other parameters.

#### Material of solder flux

- Use the resin based flux and refrain from using organic or inorganic acid based and water-soluble one.

#### Cleansing of solder flux conditions

- Use Ethanol or Isopropyl alcohol as cleansing material.
- Process temperature should be 50  $\,$  °C or less.
- Duration should be 5 minutes or less.

#### Hand soldering conditions

- $\ensuremath{\,=\,}$  Apart from the mold resin more than 1mm.
- Solder at temperature 300  $\,$  C for less than 5s.

#### Wave soldering conditions

- Temperature in Pre-heating zone should be lower than 150°C.
- Temperature in Soldering zone should be lower than 270°C.

#### Precautions for ESD

This product is the device that is sensitive to ESD (Electrostatic Discharge). Handling Hall Elements with the ESD-Caution mark under the environment in which

- Static electrical charge is unlikely to arise (Ex: Relative Humidity over 40%RH).
- Wearing the anti-static suit and wristband when handling the devices.
- Implementing measures against ESD as for containers that directly touch the devices.

#### Precautions for Storage

- Products should be stored at an appropriate temperature and humidity (5° C to 35° C, 40%RH to 60%RH) after the unsealing of the MBB. Keeping products away from chlorine and corrosive gas.
- For storage longer than 2 years

Products are sealed in MBB with a desiccant. It is recommended to store in nitrogen atmosphere with MBB sealed. Oxygen and  $H_2O$  of atmosphere oxidizes leads of products and lead solder ability get worse.

#### Precautions for Safety

- Do not alter the form of this product into a gas, powder or liquid through burning, crushing or chemical processing.
- Observe laws and company regulations when discarding this product.
