Note:

1.  $\boldsymbol{V}_{H} = \boldsymbol{V}_{H-M} - \boldsymbol{V}_{os}$ 

In which  $V_{\text{H-M}}$  is the Output Hall Voltage,  $V_{\text{H}}$  is the Hall Voltage and  $V_{\text{os}}$  is the offset Voltage under the identical electrical stimuli.

2. 
$$\alpha V_H = \frac{1}{V_H(T_1)} \times \frac{V_H(T_3) - V_H(T_2)}{(T_3 - T_2)} \times 100$$

$$\boldsymbol{T}_1 = 20$$
°C,  $\boldsymbol{T}_2 = 0$ °C,  $\boldsymbol{T}_3 = 40$ °C

3. 
$$\alpha R_{in} = \frac{1}{R_{in}(T_1)} \times \frac{R_{in}(T_3) - R_{in}(T_2)}{(T_3 - T_2)} \times 100$$

$$T_1 = 20$$
°C,  $T_2 = 0$ °C,  $T_3 = 40$ °C

#### Criteria:

- Variation of Hall Voltage  $\emph{V}_{H}$  and input/output resistances  $\emph{R}_{\text{in/out}}$  are less than 20%.
- Variation of offset voltage  $\emph{V}_{os}$  is less than  $\pm 16 \text{mV}.$
- $\overline{\phantom{a}}$  Other parameters in **Table 1**. are still within their ranges stated in **Table 1**.

### Soldering Conditions

The following conditions should be preserved. Solder ability should be checked by yourself, because it is depend on solder paste material and other parameters.

#### Material of solder flux

- Use the resin based flux and refrain from using organic or inorganic acid based and water-soluble one.

### Cleansing of solder flux conditions

- Use Ethanol or Isopropyl alcohol as cleansing material.
- Process temperature should be 50 °C or less.
- Duration should be 5 minutes or less.

### Hand soldering conditions

- Apart from the mold resin more than 1mm.

### Wave soldering conditions

- Temperature in Pre-heating zone should be lower than 150°C.
- Temperature in Soldering zone should be lower than 270°C.

### Precautions for ESD

This product is the device that is sensitive to ESD (Electrostatic Discharge). Handling Hall Elements with the ESD-Caution mark under the environment in which

- Static electrical charge is unlikely to arise (Ex: Relative Humidity over 40%RH).
- Wearing the anti-static suit and wristband when handling the devices.
- Implementing measures against ESD as for containers that directly touch the devices.

### Precautions for Storage

- Products should be stored at an appropriate temperature and humidity (5° C to 35° C, 40%RH to 60%RH) after the unsealing of the MBB. Keeping products away from chlorine and corrosive gas.
- For storage longer than 2 years

Products are sealed in MBB with a desiccant. It is recommended to store in nitrogen atmosphere with MBB sealed. Oxygen and  $H_2O$  of atmosphere oxidizes leads of products and lead solder ability get worse.

## Precautions for Safety

- Do not alter the form of this product into a gas, powder or liquid through burning, crushing or chemical processing.
- Observe laws and company regulations when discarding this product.
